Digital Growth & SEO · Content & Product Marketing · Web Design & Analytics
Mumbai, India · +91 97675 45081 · kshitijam morale5@gmail.com · [linkedin.com/in/kshitija-morale23](https://www.linkedin.com/in/kshitija-morale23) · [Portfolio & case studies](#)

PROFILE

Digital growth specialist who has independently owned an entire B2B acquisition channel — site, content, SEO, analytics and brand — for a steel exporter selling into 187 countries. Built a domain from zero to 65,000 search impressions and 293 tracked enquiries with no paid spend, then diagnosed and documented a 61% traffic decline rather than leaving it unexplained. Comfortable moving between writing the content, building the page, reading the GA4 data and deciding what to do next. MScIT, Mumbai University (2025).

SELECTED RESULTS

- **0 to 65,449 search impressions and 593 clicks in 14 months** for a domain with no prior digital presence — 667 ranking queries, 166 of them in Google's top 10, across 187 countries.
- **Average search position improved from 65.8 to 9.6** over nine months in a competitive global steel-export niche, with zero advertising budget.
- **293 enquiry events and 2,816 users captured** through GA4 event and conversion tracking I configured before launch, attributed by source and export market.
- **Shipped a weight-calculator tool that converted at 3.4% CTR** — four times the site average — and became the second-highest click driver of 80 pages on a fraction of the impressions.
- **Earned citations in AI search** — 199 sessions from ChatGPT, plus Perplexity, Gemini and Copilot referrals, alongside 542 Bing organic sessions.

EXPERIENCE

Sr. Web Designer & SEO — full digital ownership

May 2025 – Present

Triton Alloys Inc., Mumbai (Hybrid)

- Own the company's entire organic acquisition channel as a team of one: strategy, site build, content, SEO, analytics, social and brand collateral.
- Designed and built two company websites from scratch — tritonalloysinc355.com (80+ pages, September 2025) and tritonpipes.com (launched September 2026) — both structured around how buyers search by grade designation and product form, not the stock catalogue.
- Wrote all SEO content in-house: grade landing pages, comparison guides and long-form blogs. Comparison pages now rank at positions 7–8 on the highest-intent buying queries.
- Set up GA4 and Google Search Console from day one — event definitions, form and enquiry tracking, conversion funnels, source and country attribution.
- Executed a deliberate site-wide content pivot in April 2026 — rewrote 50+ pages from global to India-specific keyword targeting to align with the company's shifting buyer base; diagnosed the subsequent traffic decline as an expected Google re-evaluation cycle (3–9 months typical for domain-wide content changes), tracked recovery in Search Console, and maintained AEO/GEO citation channels independently of traditional ranking through the transition period.
- Produce all brand collateral — product and company brochures, catalogues, digital business cards, email signatures and exhibition material — and run the company's social channels end to end.

Full Stack Developer Intern

Dec 2024 – May 2025

VSure Consultancy Services, Mumbai

- Built responsive, performance-optimised web applications with React.js, Tailwind CSS and vanilla JavaScript, working alongside the design team on UI feasibility.

Digital Marketing Intern

Apr 2024 – May 2024

IIDE – Indian Institute of Digital Education, Mumbai

- Trained on SEO fundamentals, campaign planning and content strategy; produced SEO-optimised pages, infographics and video content.

Earlier internships

Jun – Aug 2024

Afame Technologies (Web Development) · Internshala (Student Partner, Digital Campaigns)

- Delivered a responsive client website in HTML/CSS/JS/Bootstrap and React; created campaign visuals, banners and landing pages driving course sign-ups.

SKILLS

SEO & Content Keyword research, search-intent mapping, on-page and technical SEO, schema markup, internal linking, comparison and landing-page copywriting, content audits and refreshes, featured-snippet structuring, AI search (AEO/GEO) optimisation

Analytics GA4 (event, conversion and funnel configuration), Google Search Console, Bing Webmaster Tools, performance reporting, CTR and position analysis

Web HTML5, CSS3, JavaScript, React.js, Tailwind, Bootstrap, WordPress, WooCommerce, Git

Design Figma, Adobe Photoshop & Illustrator, Canva Pro — brochures, catalogues, brand identity, infographics, UI and wireframing
Marketing B2B content strategy, social media management, brand voice, campaign messaging, funnel-stage content planning

PROJECTS

- **tritonalloysincs355.com** — live B2B steel exporter site, designed, built, written and ranked single-handedly. Full Search Console and GA4 history available.
- **tritonpipes.com** — second Triton domain, designed, built and launched September 2026. Covers structural steel pipes and hollow sections for a separate global buyer segment.
- **KShivora Lifestyle** — WordPress and WooCommerce storefront built and launched as a freelance engagement.
- **DurgSangram** — full-stack platform documenting the forts of Chhatrapati Shivaji Maharaj, built for a heritage community where I serve as Creative Director and Publication Head.
- **Sahyadri Treks** — WordPress site on Sahyadri trekking routes and forts, with custom plugin work.
